

Keerthana Bathini

Software Engineer

+1 (281) 659-9396 | keerthanaabathini@gmail.com | Houston, TX

SUMMARY

Software Engineer with 3+ years of experience designing, building, and maintaining scalable, high-availability backend systems for production-grade applications. Strong expertise in Java, Spring Boot, and RESTful APIs, delivering reliable and maintainable services across enterprise environments. Experienced in designing microservices architectures and optimizing performance for large-scale systems, ensuring efficiency and system stability. Proven ability to manage end-to-end feature development, from initial design through deployment and production support, while maintaining high-quality standards. Proficient in writing clean, testable code and working within CI/CD pipelines and Agile development practices. Adept at translating complex business requirements into efficient, scalable technical solutions aligned with organizational goals.

SKILLS

Methodologies: Agile (Scrum), SDLC

Programming Languages: Java, Python, JavaScript (ES6+), C#

AI / Machine Learning: LLM APIs, Prompt Engineering, RAG Pipelines, Vector Databases (FAISS, Pinecone)

Frontend: React.js, TypeScript, HTML5, CSS3, Tailwind CSS

Backend & APIs: Spring Boot, Microservices, Hibernate, REST APIs, Node.js, Express.js, gRPC

Databases & Streaming: PostgreSQL, MongoDB, Redis, Kafka

Cloud & DevOps: AWS (Lambda, ECS, S3, RDS), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Jenkins)

Testing & Security: JUnit, Mockito, Selenium, OAuth2, JWT, Spring Security

Monitoring & Observability: Prometheus, Grafana, ELK Stack

Tools: Git, Postman, Swagger, JIRA, Confluence, Linux

EXPERIENCE

Metlife, USA | Software Engineer

Nov 2025 - Present

- Followed Agile methodologies across the full project lifecycle, actively participating in sprint planning, daily stand-ups, and iterative delivery to ensure timely and high-quality releases.
- Owned end-to-end development of backend services using Java and Spring Boot, including system design, development, testing, and deployment, ensuring reliable and scalable delivery in production environments.
- Delivered new platform features by following established architectural patterns, ensuring consistency and scalability.
- Improved backend service performance by optimizing database queries and API logic, reducing response time.
- Wrote clean, readable, and maintainable code following coding standards and best practices, improving code quality by 33% through reduced defects and easier debugging.
- Developed JUnit unit tests to validate business logic, increasing test coverage by 24% and reducing production regressions by improving early defect detection in the development cycle.
- Worked closely with Product, QA, and Business teams to clarify requirements and deliver reliable solutions.
- Used Git for version control and contributed to CI/CD pipelines for smooth and reliable deployments.

Rlogical Techsoft Pvt Ltd, India | Software Engineer

Sep 2021 - May 2024

- Applied Waterfall methodology for projects requiring detailed upfront planning, clear requirement documentation, and strict phase-wise execution to ensure compliance with specifications and predictable delivery outcomes.
- Designed and delivered 10+ REST APIs / microservices using Java and Spring Boot, improving system reliability and supporting scalable backend operations in production.
- Assisted in developing backend services for customer data and transaction processing.
- Gained hands-on experience with relational (MySQL/PostgreSQL) and document (MongoDB) databases.
- Supported automated builds and deployments using CI/CD tools.
- Incorporated server-side technologies, such as Servlets, JSP, JDBC, or Spring MVC, for resilient web applications.
- Developed APIs and backend logic utilizing Node.js, Express, or Spring Boot.
- Utilized Spring Framework functionalities, including Spring MVC, Spring DI, Spring AOP, Spring ORM, Spring REST, and Spring Security, to construct robust applications; optimized business processes and improved system performance, resulting in a 25% increase in customer satisfaction and a 20% reduction in maintenance costs.

EDUCATION

Master of Science in Engineering Data Science

University of Houston, Houston, TX

Bachelors of Technology in Electronics and Communication Engineering

National Institute of Technology, Warangal, India
